

Order Today!

Quarry Hill Nature Center Native Plant Sale

All orders are pre-order only. To pre-order plants, fill out the form to the right.

Return the form to Quarry Hill via email or mail.

Email: PLANTSALE@QHNC.ORG

Mail: 701 Silver Creek Rd NE, Rochester, MN 55906

Quarry Hill members are eligible for priority fulfillment of orders received by March 17th.

All orders must be received by April 7th. Orders will be filled in the order received while supply lasts. We will notify you if we are unable to process your order.

Please look for a confirmation email indicating we've received your order.

Payment:
Pre-payment by phone is required.

Please call the Quarry Hill office at 507-328-3950 during the following timeframes:
Wednesday, April 19th from 9 am – 4 pm or
Thursday, April 20th from 9 am – 4 pm

We will only charge your card for what plants we are able to fill out of your order. Sometimes due to the growing process, we are not able to receive all of our ordered plants.

You can then pick up your plants at one of the following dates/times:

Friday, April 21st – 3:30-5:30 pm

Saturday, April 22nd – 8:30 am – 10:30 am

Just drive up to our garage, and we will put them into your trunk for you!

Plants are sold in 2.5" width by 3" depth pots

Quarry Hill cannot guarantee that any plant purchased from us will survive in the garden, although we are very interested in hearing if you have disappointments with a certain plant. Thank-you

Flowers for Sunny Areas

Butterfly Milkweed 🦋🐝🐦 24" tall, orange flowers in mid-summer; attracts butterflies; widely used in gardens

Button Blazing Star 🦋🐝🐦 36" tall, purple flowers July through Oct., attracts butterflies & hummingbirds, song birds eat the seeds, med-dry soil, also called Rough Blazing Star

Cardinal Flower 🦋🐝🐦 30" flower stalk, brilliant red in late summer; attracts hummingbirds and swallowtail butterflies; likes moist rich soil

Common Ironweed 🦋🐝🐦 72" tall brilliant purple blooms Jul-Sep; named for its strong stem, ironweed will provide a great backdrop to shorter natives; host plant of the painted lady butterfly & is listed by the [Xerces Society](#) as having special value to native bees; deer resistant

Dotted Blazing Star 🦋🐝🐦 24" tall purple flowers July-Sep; med-dry; tolerates sandy/gravelly/poor soil; attracts bees, butterflies & birds; deer resistant

Large-flowered Beardtongue 🐝🐦 24" tall pink/purple flowers in May-June; med-dry soils; tolerates sandy /gravelly/ poor soil; stunning large, tubular flowers is loved by bees and hummingbirds

Prairie Coreopsis 🦋🐝 24"; it prefers med. to dry soil conditions and sets striking yellow flowers for 3-4 weeks, usually in June and July. Beekeepers consider all Coreopsis species to be good honey sources

Prairie Phlox 🦋🐝🐦 24" tall with showy white/pink/lavender flowers bloom early summer, med-dry soil; favorite of butterflies and pollinators

Narrow-leaved Coneflower 🦋🐝🐦 24" tall pink/purple blooms Jun-Jul; med to dry soil; attracts many pollinators including the MN endangered Ottoe Skipper; drought & deer resistant; also called Narrow-leaved Purple Coneflower

New England Aster 🦋🐝 40" tall, purple flowers in fall & lasts through first frost, attracts migrating monarchs

Rose Milkweed 🦋🐝 48" large heads of rose-pink blossoms in early fall; host plant for monarch caterpillars; moist to med. soil; Deer resistant; also called Swamp Milkweed

Stiff Goldenrod 🦋🐝 48" tall; showy head of yellow blooms Aug-Oct; a valuable source of nectar for migrating monarchs; leaves turn red in fall; contrary to popular myth -not the cause of seasonal hay fever as the pollen is too large to become airborne; deer resistant

White Prairie Clover 🦋🐝🐦 24" tall, white blooms June to Sept: birds, bees, & butterflies are all fans of the prairie clover; an excellent nitrogen fixer

Wild Bergamot 🦋🐦 36" tall violet crowns of flowers July-Sep; distinctively aromatic foliage; favorite of butterflies, bees and hummingbirds; med-dry soil; deer resistant

Wild Lupine 🦋🐝🐦 24" tall, purple blooms May to July, prefers well drained soils, will tolerate sandy soil; this legume is essential to the life cycle of the Karner Blue butterfly, a federally-endangered species native to the Great Lakes region.

Native Grasses

Little Bluestem 2' tall, fine leaves with beautiful seed heads & bronze fall color; med-dry soil, widely used in gardens

Northern Dropseed 1' tall mound of fine leaves with 2' 'spray' of seed head; widely used in gardens

Palm Sedge A widely-used 3' tall sedge for home landscaping for its attractive "palm" formation, clumping behavior and ability to tolerate full sun-full shade; med soil

Side Oats Grama 16' tall, a rare native grasses that sports tiny attractive flowers during its summer bloom time; forms small to medium bunches; med-dry soil;

Flowers & Ferns for Shady Area

Bellwort 🐝 12" tall, yellow blooms Apr-May; med soil; spreads slowly to form colonies; nectar & pollen source for a variety of native bees

Columbine 🐦🦋🐝 24" tall, red blooms in spring, also grows in sun, med-dry soil, great hummingbird feeder

Jack-in-the-Pulpit 12" tall, excellent woodland garden plant; requires very little care once established; thrives under a variety of conditions, but grows most vigorously in moist, shady, seasonally wet locations; deer resistant

Jacob's Ladder 12" tall, showy blue flowers in spring; med-med dry soils; deer resistant

Maryland Figwort 🦋🐝🐦 60" tall, red/green flowers in July-Oct, med. to dry soils, deer resistant; doesn't have a showy flower but it is one of the best nectar species for attracting native butterflies, bees, other insects & birds; thrives in full sun to 70% shade

Virginia Bluebells 18" tall, blue flowers, early in damp areas. Virginia Bluebells dies back in mid-summer making it a true spring ephemeral

Wild Blue Phlox 🦋 12" tall, blue flowers in May, med. to dry soils, deer resistant

Wild Geranium, 🦋🐝 12" tall, pinkish-purple flowers, readily spreads, forming stunning patches that everything from bees to butterflies can't resist, med. soil

Wild Ginger 12" tall, heart-shaped velvety green leaves, small flower near the ground. Good ground cover, deer resistant; prefers moist soils

Lady Fern 12" tall; classic fern for any shade garden, will tolerate full sun to full shade; prefers med- med wet soil; will spread slowly; deer/rabbit resistant
